

LETTER OF RECOMMENDATION

Norwegian company Energi Teknikk AS is a total supplier of equipment and services for the development and operation of small hydro power plants. The company has 22 employees and offers proprietary turbines, switchboards and control systems. We also have a service department for operating and maintenance services.

Energi Teknikk AS was established in 1998, following entrepreneur Eivind Tvedt's development of his own small power plant in the river at his family farm in Kvinnherad, Norway. Having had excellent local help to develop and produce a turbine for the plant, Tvedt established Energi Teknikk. Until today Energi Teknikk AS has delivered more than 170 hydro power projects.

Mr. Milan Barackov, has been cooperating with Energi Teknikk AS for several years on the activities of international hydropower projects in terms of connecting clients as well as establishing cooperation with companies for the production of mechanical equipment and other important aspects for Energi Teknikk AS. In all his business activities, Milan strived to contribute to the successful outcome of the undertaken task. Mr. Milan Barackov also played a key role for Energi Teknikk AS in certain strategic activities.
